

DIRT LATE MODEL & DIRT MODIFIED WOMP CLASS

Chassis:

American Adrenaline MaxThrust - AA

Champion Thumper - 400

Champion Thumper - 401

H&R Stinger - HRST01

LVJ Charger - 002

LVJ Charger brass - LVJ002B

Mid-America Stomp Brass - 202B

Mid-America Stomp Steel - 202C

R-Geo Goblin - 334

R-Geo Goblin SS - 344

RP Performance Intimidator 1 - 2394

Bracing is permitted. Motor mount may be not cut off. Motor must be mounted 90 degrees to the rear axle. Drilling, grinding, bending, or cutting of the chassis is not permitted. Chassis must remain as a "one-piece" unit. No 'flexi' style multi-piece modifications are permitted. Additional weight is permitted. LVJ chassis must have the front screws assembled and soldered or secured with LocTite (or equivalent) and be tight to the chassis. No ball bearings. Pin tubes are allowed, but bodies must remain rigid. No 'floaters.'

Width & Wheelbase:

Width: 3" centered with 1/8" offset permitted. Width is to be measured by any commercially available manufacturer's tech tool.

Wheelbase: Maximum of 3-1/8" center to center of axles.

Clearance:

.047" clearance measured from under the motor endbell back, including the crown gear.

Motor:

JK Hawk 25 - JK30325

Motor must be mounted in line at 90 degrees to the rear axle. JK Motors must be mounted with a motor ID stamp visible. Motor may be tack-soldered in place.

Guide Flag:

Any flag that is commercially available. No shortening of the guide flag. Cutting excess shaft above the nut is permitted.

Tires & Axles:

Front: 1/8" solid axle permitted. 3/4" diameter front tire. No O-rings.

Independent front axle is permitted. No rounding, curving, or coning is permitted. Tires may be narrowed to 3/8" min. width. White lettered tires *are not* required. Tires may be painted with fingernail polish.

Rear: 1/8" solid axle. Any diameter tire that provides the required minimum clearance.

Gears:

48 pitch crown and pinion only. Any manufacturer. Beveled pinion gears are permitted.
